

Model	Description
<b>Reference Series</b>	
NuForce Reference 20	In its 17"-wide chassis, the Ref-20 stands as NuForce's finest Reference Series mono amplifier to date. The Ref-20 delivers an extremely refined audiophile performance at even greater output power ratings of 200-WRMS at 8-ohms & 420-WRMS at 4-ohms.
NuForce P20	The NuForce P-20 is a preamplifier of understated elegance that offers the most accurate volume control present-day technology permits, in combination with a circuit design that reduces noise and distortion to near-theoretical limits.
<b>Home Desktop/Portable</b>	
NuPrime uDSD	The NuPrime uDSD is a USB powered portable DAC and headphone amp capable of supporting up to DSD256 and PCM384
<b>High-End Stereo</b>	
NuPrime IDA-16	The NuPrime IDA-16 Integrated Amplifier is a single-chassis, integrated stereo amplifier with a DAC capable of supporting DSD native playback (DSD64, DSD128 and DSD256). It offers five digital inputs, one stereo input and 200W x 2 power amplifier for complete system flexibility and ability to drive just about any speakers on the market.
NuPrime IDA-8	The NuPrime IDA-8 Integrated Amplifier is a single-chassis, 180Wx2 integrated stereo amplifier with a DAC capable of supporting PCM384 and DSD256 decoding. It offers 1 x USB, 1 x Coaxial, 1 x Optical and 1 x Analog Stereo inputs, with Bluetooth dongle.
NuPrime DAC-10H	The NuPrime DAC-10H is a Digital Headphone Amplifier offering PCM 384K & DSD256 decoding. The DAC-10H's balanced headphone amplifier is capable of driving headphones in balanced and single-ended configuration and can be used with up to two dynamic headphones. DAC-10H comes with a unique dual gain settings for RCA, XLR, and each of the balanced and unbalanced headphone outputs. With five digital & two analog stereo inputs, the DAC-10H is a full-featured DAC and preamp more than suited for any high-end system.
NuPrime DAC-10	DAC-10H without the headphone amplifier.
NuPrime ST-10	The ST-10 amplifier is NuPrime's Reference LE (near-reference) power amplifier for listeners who require a reference-class amplifier at a somewhat lesser power rating of 2 x 150W (8 Ohm).
<b>High-End Home Theater</b>	
NuPrime HDAV-30	The NuPrime HDAV-30 all-digital HT preamp/processor delivers ultra-high resolution USB audio decoding at PCM 384K or DSD256, 24bit/192kHz digital audio, hard-disk media playback, wireless streaming and superb 4K HD video. With six HDMI, two optical, two coaxial, four stereo analog, one USB Audio and three USB Host (for hard drive) inputs. A built-in WiFi network supports Airplay, DLNA and Miracast. The HDAV-30 easily accommodates the most complex home theater system configurations.
NuPrime HDAV-30X2	HDAV-30 with 200W X 2 @ 8 Ohm power amp.
NuPrime MCA-K38	The NuPrime MCA-K38 is a Reference LE class multi-channel amplifier designed for uncompromising home theater and music listening. Offering quality parts throughout and advanced, new generation of high-efficiency 700kHz switching amplifier operations, the MCA-K38 delivers a full 400 watts into 4 Ohm (200W at 8 Ohm) per channel. Each pair of output channels can be bridged to double the power to 400W at 8 Ohm.
